

Custom Printed Roll Wrap Packaging

Grow Your Business with Custom Printed Roll Wrap Packaging

Your Packaging Solution

Machined parts, rollers, weldments, and other metal fabrications require special packaging for protection, cleanliness, and proper handling during shipping and storage.

To provide you with the best packaging for your business needs, we custom print and manufacture your packaging to your exact specifications.

Your custom packaging starts with a high-quality print. We can print your logo, business information, website address, safety instructions, and other designs of your choice onto high quality, durable, Kraft paper.

Color options: 1-4 colors & PMS color matches available.

Paper options: Bleach (white) or natural (brown) Kraft paper.

To give your packaging strength, we can laminate your choice of clear or black polyethylene (poly) to the paper. Laminating poly to your packaging provides you with an extra layer of strength and serves as a barrier from moisture. The use of black poly will further protect your products from the harmful effects of Ultra Violet rays from sunlight.

Laminating options:

1. Clear poly on the front side of the wrap over of the print, the back side, or both sides.
2. Black poly on the back side only.
3. Clear poly on front over the print and black poly on the back (recommended)

Roll Wrap Options

We customize your wrap to your exact specifications.
Please choose from the following options

- **Paper:** White or Brown (natural) Kraft Paper.
- **Colors:** 1-4 colors & PMS color matches available.
- **Polyethylene Film Options:**
Laminate the outside, inside, or both sides of the wrap
Clear or Black Film. Solid Laminate only.
- **Roll Dimensions:** We customize your wrap to your exact requirements—width, length, & weight.
